

Edwin Cortazo

Yonkers, NY | 914-310-3426 | edwincortazo@gmail.com | [linkedin.com/in/edwin-cortazo](https://www.linkedin.com/in/edwin-cortazo) | github.com/Edwin580

EXPERIENCE

- Sigma** | *New York, NY*
2026
Software Engineer Intern

- Shipped the Manual AI Columns feature end-to-end in TypeScript and React, rolling it out to production users.
 - Built a reusable caching layer for AI Columns and reduced query latency 75% by adding a schema-level index.
 - Designed a dual-warehouse model deprecation-tracking system: Cortex API integration for proactive Snowflake model flips, and weekly hash-based scraping of Databricks lifecycle docs with automated Slack alerts for human review.

June 2026 - August 2026
- Zwilling J.A Henckels** | *New York, NY*
Data Science Intern

- Built an automated Python/PostgreSQL pipeline to audit shipment reports, ensuring 99.9% data integrity.
 - Created a TypeScript/React monitoring suite to visualize KPIs and optimize SQL query performance.

November 2025 - May 2026
- Bucherer 1888** | *New York, NY*
Data Management Intern

- Built Python automation scripts to validate data, supporting 100,000+ records with zero downstream data errors.
 - Reconciled invoice and product data across legacy systems using pandas and Excel ETL workflows, cutting review time by 90%.

October 2025 - May 2026
- Lowe's** | *Charlotte, NC*
Software Engineer Intern

- Built and deployed ProRange, a React UI + Kotlin/Java Spring Boot microservices platform used in 1,700+ stores.
 - Improved backend API performance 25% and reduced scheduling errors by optimizing validation and data sync workflows.

May 2025 - August 2025
- Vassar College Cognitive Science Department** | *Poughkeepsie, NY*
Cognitive Science Programmer

- Developed interactive web experiments with JavaScript/jsPsych, serving 100+ participants with real-time feedback.
 - Automated data collection and ETL pipelines in Python, reducing pre-processing time 40% for 10k+ experimental trials.

September 2024 - May 2025
- Sponsors for Educational Opportunity** | *New York, NY*
2024
Tech Developer Intern

- Created internal tools using Flask, PostgreSQL, and REST APIs used daily by 50+ staff.
 - Implemented CI/CD automation and unit tests maintaining 90% coverage across 15+ endpoints.

June 2024 - August 2024

EDUCATION

- Vassar College** | *Poughkeepsie, NY*
Bachelor of Arts, Computer Science & Cognitive Science

- Coursework:** Data Structures & Algorithms, Machine Learning, Theory of Computation, Neural Networks, Software Design

TECHNICAL PROJECTS

- Music Generation Model** | Python, TensorFlow, Keras, pretty_midi

- Implemented LSTM sequence2sequence model on 2,000 + MIDI files; performed EDA and feature engineering on 500 MB.
 - Utilized Keras and scikit-learn for training and evaluation; produced statistical summaries and visualizations of model output.
- EcoHealth** | JavaScript, React, Python, Flask, Chart.js, REST APIs

- Engineered an environmental analytics dashboard integrating three APIs; data processing and visualization for 100 + cities.
 - Deployed on AWS EC2 and S3, implementing automated data refresh pipelines and API caching strategies.
- Moral Pop-Out Effect Replication Study** | JavaScript, R, Statistical Analysis, HTML/CSS

- Developed full-stack web experiment, pipelining real-time data, investigating valence and perception.
 - Built custom JavaScript features for real-time data tracking, response timing, and accuracy metrics.

TECHNICAL SKILLS

- Languages:** Python, Java, Kotlin, JavaScript, TypeScript, SQL, C++, R, HTML/CSS
- Frameworks:** React, Spring Boot, Flask, Node.js, Express, TensorFlow, Keras, GraphQL, Pandas
- Databases/Tools:** PostgreSQL, MySQL, MongoDB, Redis, Docker, Git/GitHub, Jenkins, Kubernetes
- Practices:** CI/CD, TDD, REST API Design, Agile/Scrum, Code Reviews
- Cloud & OS:** AWS (EC2, S3), GCP (BigQuery), Linux/Unix, macOS
- AI-Assisted Development:** Claude Code, Codex, MCP, agentic workflows
